Contemporary Socioeconomic Problems

This course will analyze the issues of intellectual property, environmental damage, trade-mark infringement, brand value, and multi-level marketing. The order of topics may vary as well as the time devoted to each.

Homework and class problems are likely to be assigned on an ongoing basis as appropriate. The meeting time for the course is not subject to change. Any student missing more than 25 percent of lectures may receive a lower grade in the course at my discretion.

A course project is likely and it will constitute 25 percent of the final grade. Twenty-five percent of the final grade will be determined by homework while the remaining 50 percent will be determined by a final examination.
