

Dorchester is also seeking an intern

The ideal candidate would be a senior graduating in 2005 that possesses some finance/investments background. The person would work with our research analyst and associate and assist in project-based work, such as:

- Helping design a comprehensive information management system
- Helping design and implement quantitative risk management models
- Assisting with database upkeep and hedge fund manager communications
- Programming and updating VBA models in Excel
- Doing some light clerical work (filing, proofreading, etc.)

More information is available at
