

THE WILLIAM AND MYRTLE HARRIS DISTINGUISHED LECTURE
SERIES IN SCIENCE AND CIVILIZATION

On Meerkats and Marmots: Long-term Research and the Birth of Behavioral Ecology

THURSDAY, MAY 18, 2023
5 PM // 147 NOYES

ERIKA L. MILAM

Charles C. and Emily R. Gillispie Professor in the History of Science;
Professor of History, Department of History, Princeton University

By investing in long-term projects, ecologists have crafted living archives of animal behavior that now constitute decades of data on chimpanzees, marmots, scrub jays, meerkats, bottlenose dolphins – and more. Through a historical lens, this talk explores the importance of such long-term thinking in a world that exalts quick innovation.
